Professional Summary

Organized and self-motivated software engineer graduate with 2+ years combined internship and professional experience. Fluent in .Net C#, SQL, Python, JavaScript, and CSS programming languages. Possess practical working knowledge of relational databases using PostgreSQL, SQL Server, Cloud Development, and Agile Development. Constantly updating personal and professional technical skills with complementary collegiate courses and online bootcamps. Reliable and responsible team player.

Professional Experience

Senior Software Engineer at TechCorp Inc.

Jan 2020 - Present | San Francisco, CA

- Reduced latency by 40%

- Mentored junior developers

- Led development of microservices architecture.

- Reduced system latency by 40% through optimization.

- Mentored junior developers in agile methodologies.

- python and Django for backend development.

- quickly learn new technologies and adapt to new environments.

- Mentored junior developers in agile methodologies.

- Collaborated with cross-functional teams to deliver high-quality software products.

- Reduced system latency by 40% through optimization.

- Implemented CI/CD pipelines for automated testing and deployment.

- Designed and developed RESTful APIs for internal and external services.

- Implemented CI/CD pipelines for automated testing and deployment.

- Designed and developed RESTful APIs for internal and external services.

- Utilized Docker and Kubernetes for containerization and orchestration of services.

Software Engineer at StartUp Solutions

Jun 2017 - Dec 2019 | New York, NY

- Led development of microservices architecture.

- Reduced system latency by 40% through optimization.

- Mentored junior developers in agile methodologies.

- python and Django for backend development.

- quickly learn new technologies and adapt to new environments.
